1 INTRODUCTION

1.1 Document Purpose

The Fedwire Funds Service is migrating to ISO 20022 message format for the Fedwire Funds Service in a single-day implementation strategy on **March 10, 2025**. With this implementation, existing Fedwire Application Interface Manual (FAIM) message formats will be replaced with ISO20022 messages. This document provides Funding Participants and Funding Agents instructions regarding the Fedwire® Funds transfer message requirements for initial and supplemental funding to the Prefunded Balance Account*. It also identifies the Fedwire message information that The Clearing House will include with disbursements of a Participant's Excess Liquidity through Fedwire.

Participants must adhere to Fedwire Standards to formulate a ISO20022 pacs.009.

2 INITIAL AND SUPPLEMENTAL FUNDING REQUIREMENTS – pacs.009

Any funds transfer sent to the RTP Prefunded Balance Account must include the following key Fedwire message tags and data elements:

Fedwire FAIM 3.0.7 Tag	Name	ISO 20022 Data Element *pacs.009	TCH Notes/Usage
1510	Type/Subtype	Payment Type Information/Local Instrument Code	<p>Payment Type Information specifies the type of credit transfer that is sent across the Fedwire Funds Service. Local Instrument Code specifies the type of credit transfer sent across the Fedwire Funds Service. Core Funds for pacs.009 :</p> <p>BTRC: Core Bank Transfer</p> <p>As per previous mapping, TCH used to map value 16 for Type, and 00 for Subtype, 16 is Settlement Transfer (Funds transfer between Fedwire Funds Service Participants) and Subtype as 00 (Basic Funds Transfer)</p> <p>pacs.009 Path: /Document/FICdtTrf/CdtTrfTxInf/PmtTpInf/LclInstrm/Prtry</p> <p>Value = BTRC</p> <p>Example:</p> <pre><LclInstrm> <Prtry>BTRC</Prtry> </LclInstrm></pre>

1520	Input Message Accountability Data (IMAD)	Message Identification	<p>The Message Identification in the Group Header must be the IMAD (for value messages). The Input Message Accountability Data (IMAD) is composed of the Input Cycle Date (8 numerical characters, CCYYMMDD representing the Fedwire funds-transfer business day) + the Input Source (8 alphanumeric characters representing the unique Endpoint ID of the Fedwire Sender), + the Input Sequence Number (6 numeric characters, should be incremental and start with 000001 at the start of each Input Cycle Date per Endpoint ID).</p> <p>pacs.009 Path : /Document/FICdtTrf/GrpHdr/MsgId</p> <p>Example:</p> <p><MsgId>20240827MMQFMCPE000001</MsgId></p>
2000	Amount	Interbank Settlement Amount	<p>Interbank Settlement Amount specifies the amount of the funds transfer (The dollar amount to be applied to the applicable Participant's or Funding Provider's Prefunded Position)</p> <p>Note : <i>The currency for all payments is USD. The amount contains the dollars and cents separated by the decimal point without commas.</i></p> <p>pacs.009 Path: /Document/FICdtTrf/CdtTrfTxInf/IntrBkSttlmAmt</p> <p>Example:</p> <p><IntrBkSttlmAmt Ccy="USD">5908979.95</IntrBkSttlmAmt></p>
3100	Sender DI	Instructing Agent	<p>Instructing Agent sends the FI credit transfer across the Fedwire Funds Service. * For Disbursement Requests initiated by a Funding Provider²:

- If the Disbursement request indicates that it is for an individual Non-Funding Participant, and the Non-Funding Participant has a Beneficiary Account ID associated with its RTP provisioning data, the Participant's Beneficiary Account ID will be included in the Fedwire message.
- If the Disbursement request indicates that it is for an individual Non-Funding Participant, but the Non-Funding Participant does not have a Beneficiary Account ID

RTP Client Fedwire Interface Instructions FAIM to ISO20022 associated with its RTP provisioning data, and the Funding Provider has a Beneficiary Account ID associated with its Funding Agent Account provisioning data, the Funding Agent Account's Beneficiary Account ID will be included in the Fedwire message.

- If the Funding Provider requests a disbursement without indicating a Non-funding Participant for the disbursement, the Beneficiary Account ID associated with its Funding Agent Account's RTP provisioning data will be included in the disbursement.
- If neither the Non-Funding Participant nor the Funding Provider have designated a Beneficiary Account ID in the RTP System, this field will not be present in the Fedwire message that executes the disbursement.

² A Funding Provider is a type of Funding Manager. When requesting a disbursement a Funding Provider may request that the disbursement be applied to the Net Position of a Non-funding Group Member. See the RTP Operating Rules for details.
